

LONLORD

Innovation
Efficiency
Win-Win

LonLord Industry Group

Our Smart Lonlord Solutions

- Smart Meters (Electric, Water, Gas), Prepaid & Postpaid
- Cloud Seeding (artificial Rain making)
- Smart Transport (Electric solar Busses and Marine transport)
- Ground Penetrating Radars (Utilities and mining)
- Power Plants (Electricity Plants Turbines and Gensets)
- Heavy Lifting Transport UAV up to 3.5 tonnes
- Military Drones and Robots
- Energy Storage Skids and Stations
- Solar Farms and Fast deployment solar panel containers

Our Smart Lonlord Solutions

- MIC Modular Buildings and Site Management
- Oilfield and refinery Supplies
- Port traffic vehicle management systems
- Tollway and highway management solutions
- Firefighting and mixed mission solutions
- Smart Water Comprehensive Management System
- Smart Medical Healthcare, Hospital management, NCS, Outpatient++)
- Intelligent Buildings

Our Smart Lonlord Solutions

- LonLord New generation weapon storage and tracking system Solution
- A high-end, comfortable, safe, and technologically advanced smart community
- Smart Park Comprehensive Management System
- Smart Agriculture (Green house control)
- Smart Schools Education, Campus and classroom systems
- Smart Banking Complete solution (Smart comprehensive CRM ATM)
- Smart City
- Smart Hotels

Oilfield and refinery supplies

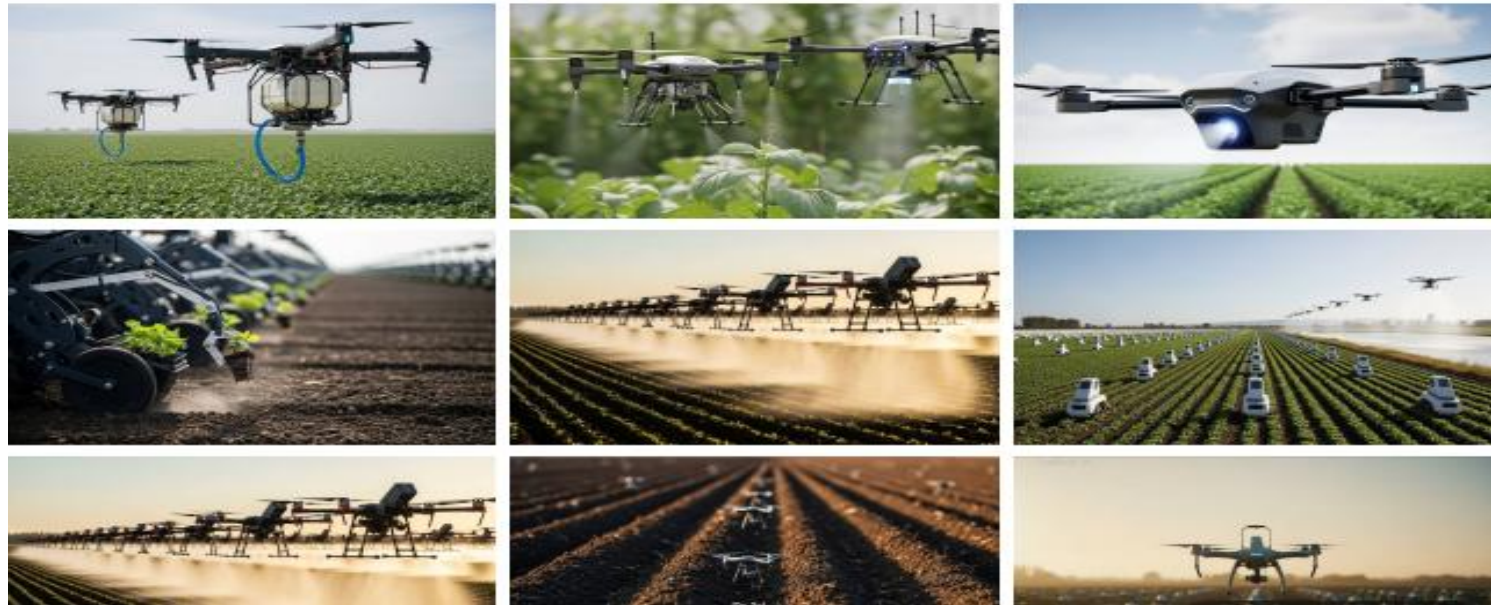

Heavy lifting Drones and Multi mission

Smart Electric Buses with Solar Tech.

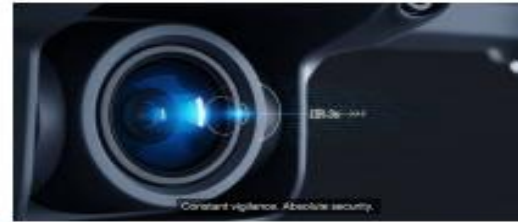

Lonlord Agriculture

Smart Marine Transport and Port Management

Multisession Drones and Robots

Cloud Seeding , Artificial rain

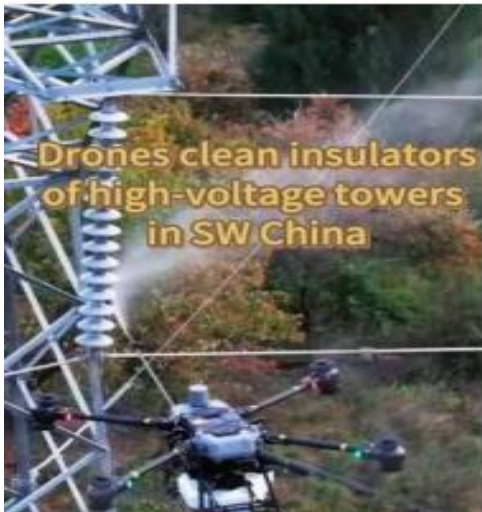

Ground Penetrating radars, Utilities and mining

Smart Transport and Toll Managment

Electric towers, and Solar panels cleaning drones

Mining, construction, batching plants, cranes and more..

Smart Medical , Storage, Labs, Management, NCS and More

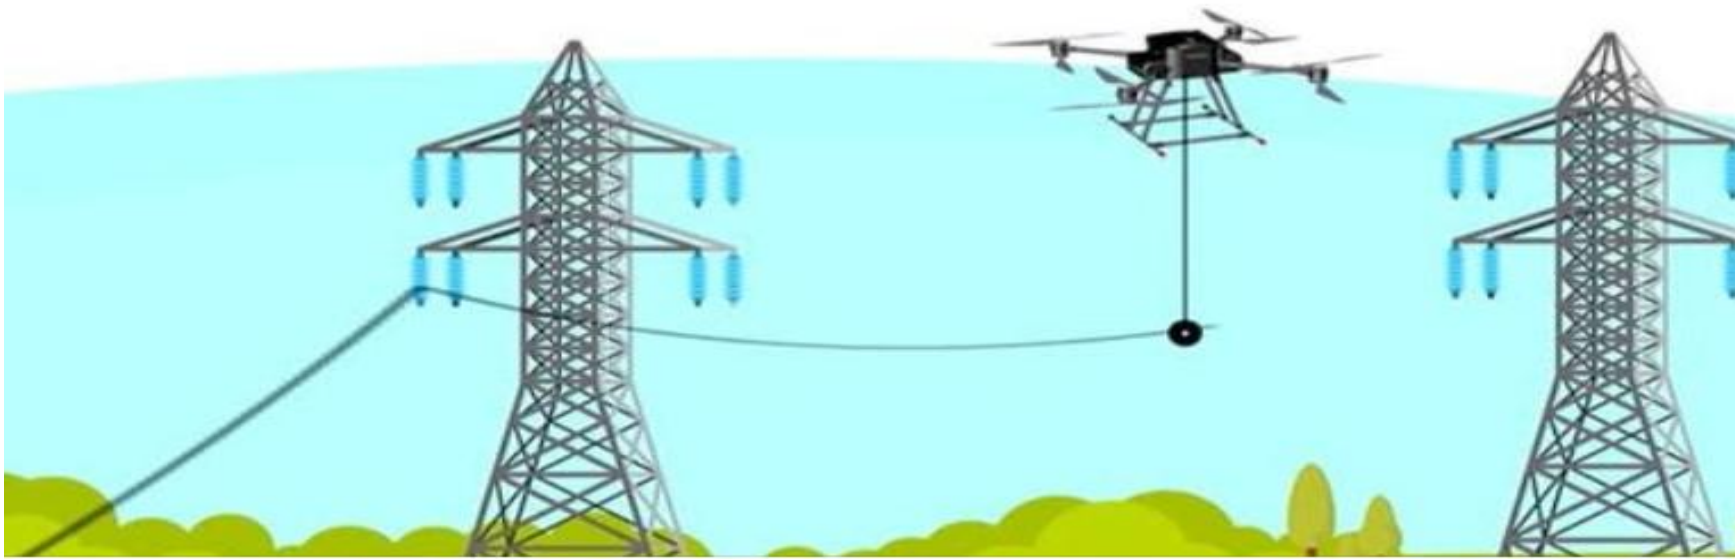

Firefighting Drones

Fast Deployment Skids, Storage and Generation

Special Mission Drones

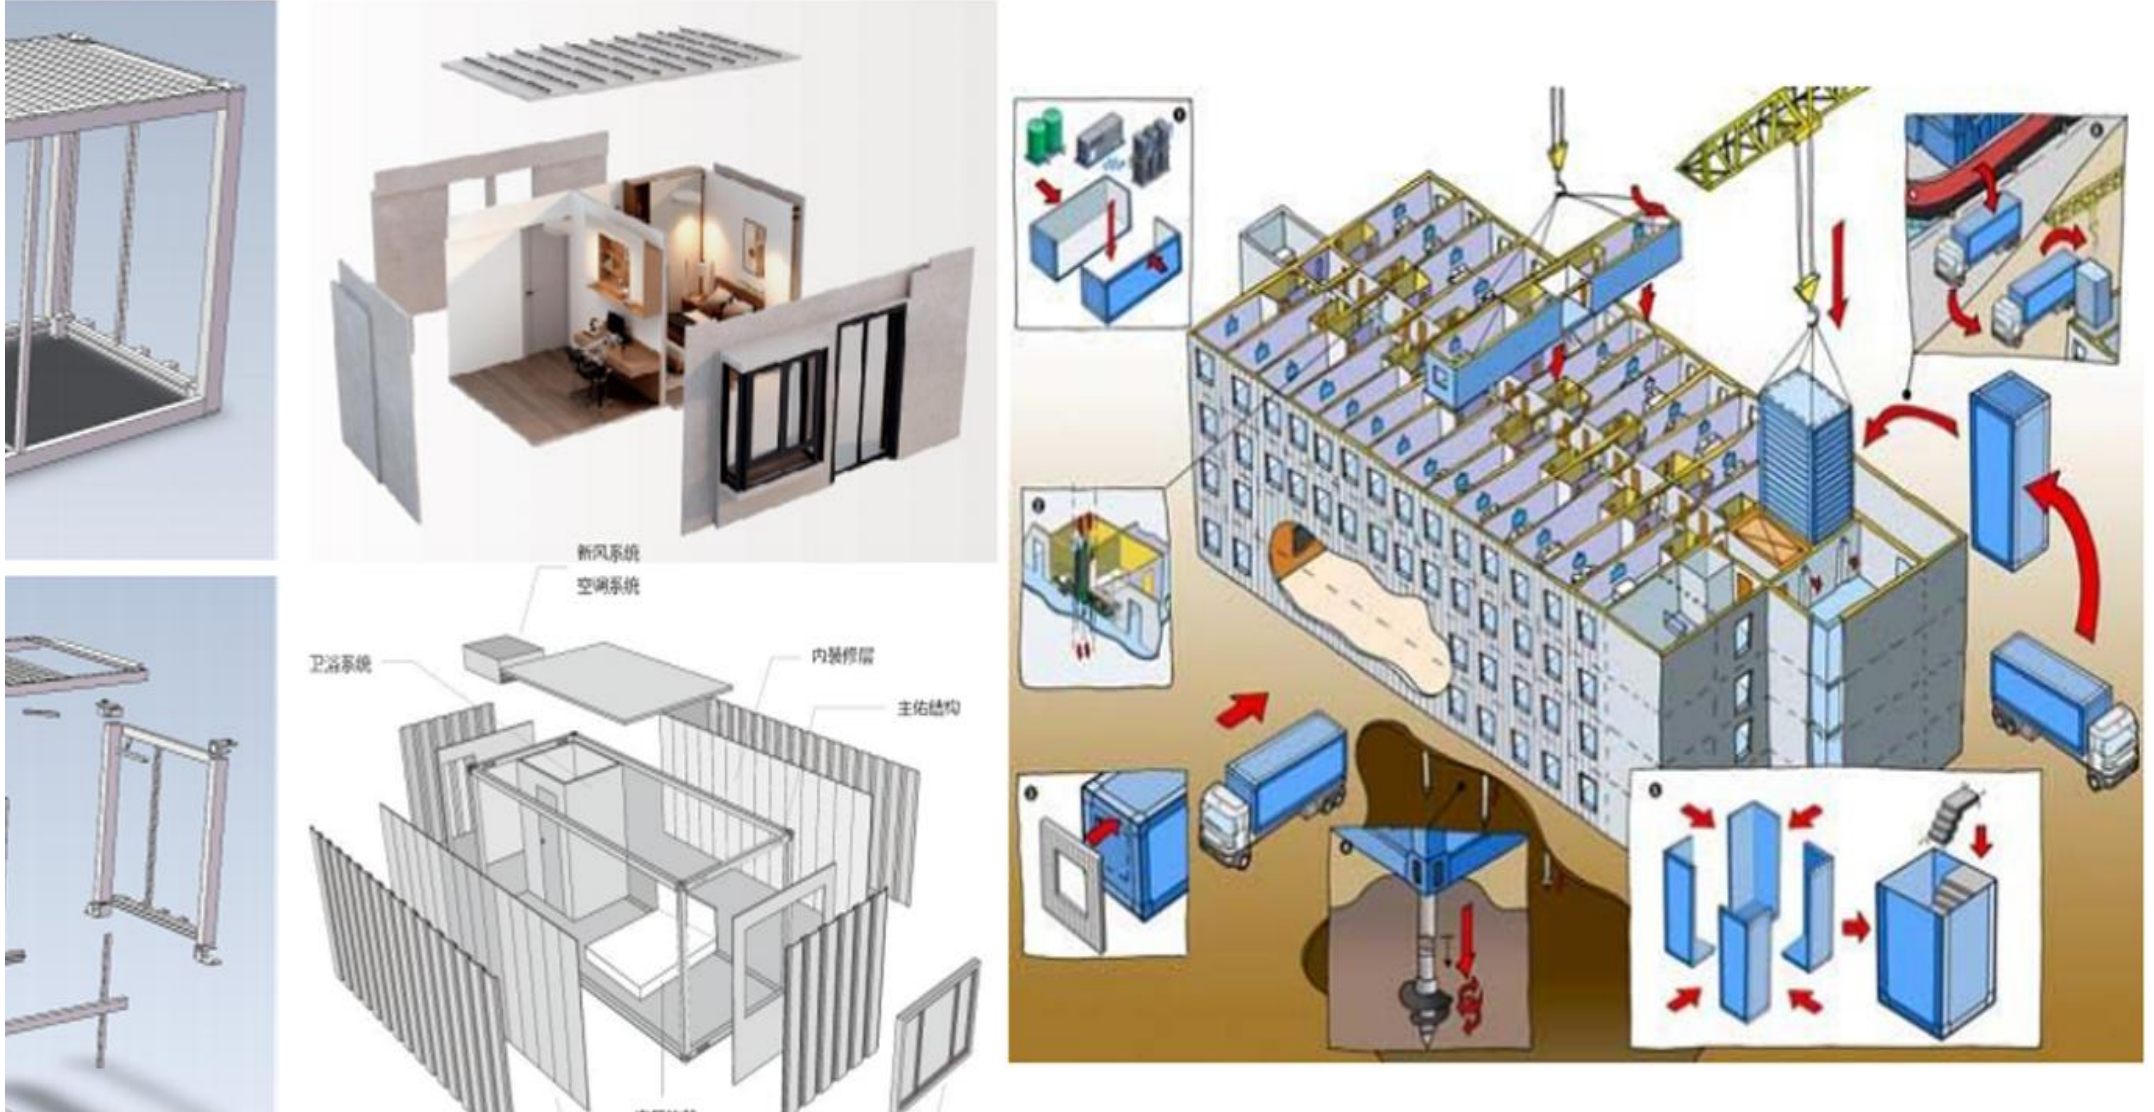

Weapon storage and tracking

self serve cash machine

Modular MIC Buildings and architecture

Power Plants and Gensets supply solutions

Company Introduction-Founded in 2005, Shanghai

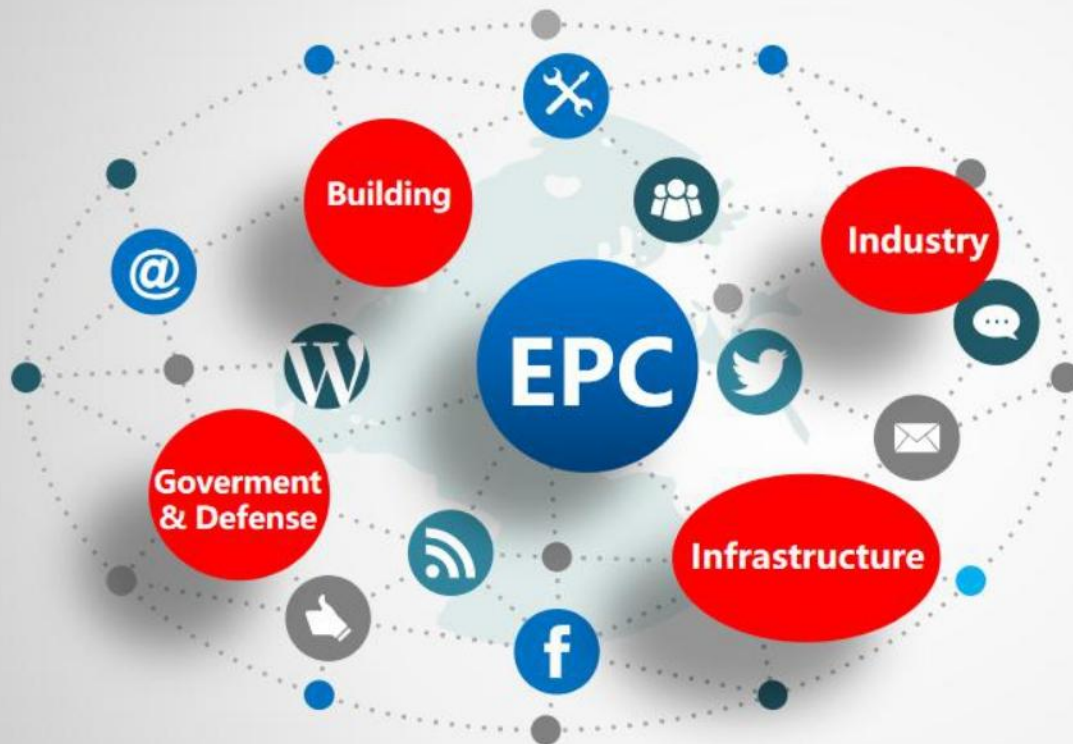

China National High-Tech Enterprise
Specialized & Innovative Enterprise

Member of the China Ministry of Industry and
Information Technology Committee

Industrial Structure 3+3+4

3 Products:

Large load UAV
Inspection Robot
Container Energy

3 Technologies(EPC):

Research and Development (R&D)
Manufacturing
Solutions

4 Domains:

Government & Smart City, Defense
Industrial explosion-proof products
(SCADA)
Infrastructure, Data Centre
Building (Hospitals, schools)

Key Product

LonLord focus on Industrial Explosion proof Robot, unmanned aerial vehicle (UAV) ,Intelligent system integration services.

Key Product (Multi-rotor drone 1)

Deterrence drones, shouting, strong sound and light to disperse, loudspeakers, gas, capture nets, destroy the psychology of terrorists.

Key Product (Military Reconnaissance UAV 2)

Vertical take-off
fixed-wing drone

Cruise Missile Drone

Fixed-wing Sliding Drone

Key Product (Military UAV 3)

Key Product (Military UAV 3) -Cluster collaboration

Key Product (Emergency Rescue UAV 4)

LonLord focus on Industrial Explosion proof Robot, unmanned aerial vehicle (UAV) ,Intelligent system integration services.

Key Product (Military UAV 5)

Key Product (Military UAV 6)

LonLord H16-V12 reconnaissance and attack integrated

Model: H16-V12

Basic parameters

Body size 1530mm × 1750mm × 830mm

Aircraft wheelbase 1650mm

Battery life ≤ 60 minutes

Maximum load ≤ 25kg

Flight radius ≤ 15km

Operating temperature -40℃~+85℃

Disassembly and assembly time < 2 minutes

Power battery 30000mAh

Flight speed < 18m/s

Flight altitude ≤ 5800m

Practical ceilings 4500m

Wind resistance level 7

Protection level IP55

Positioning accuracy: horizontal ± 0.02 meters, vertical ± 0.05 meters

Satellite positioning: Beidou, GPS, GLONASS, RTK, three-star seven frequency

Functional features

Intelligent
Flying

Simulated ground flight, guided flight, guided evasion, breakpoint continuation flight, All point
takeoff and landing

One click takeoff and landing, one click return, route planning, multi task management,
safety protection against magnetic interference, triple redundancy protection, low power
return, last contact return, and propeller protection

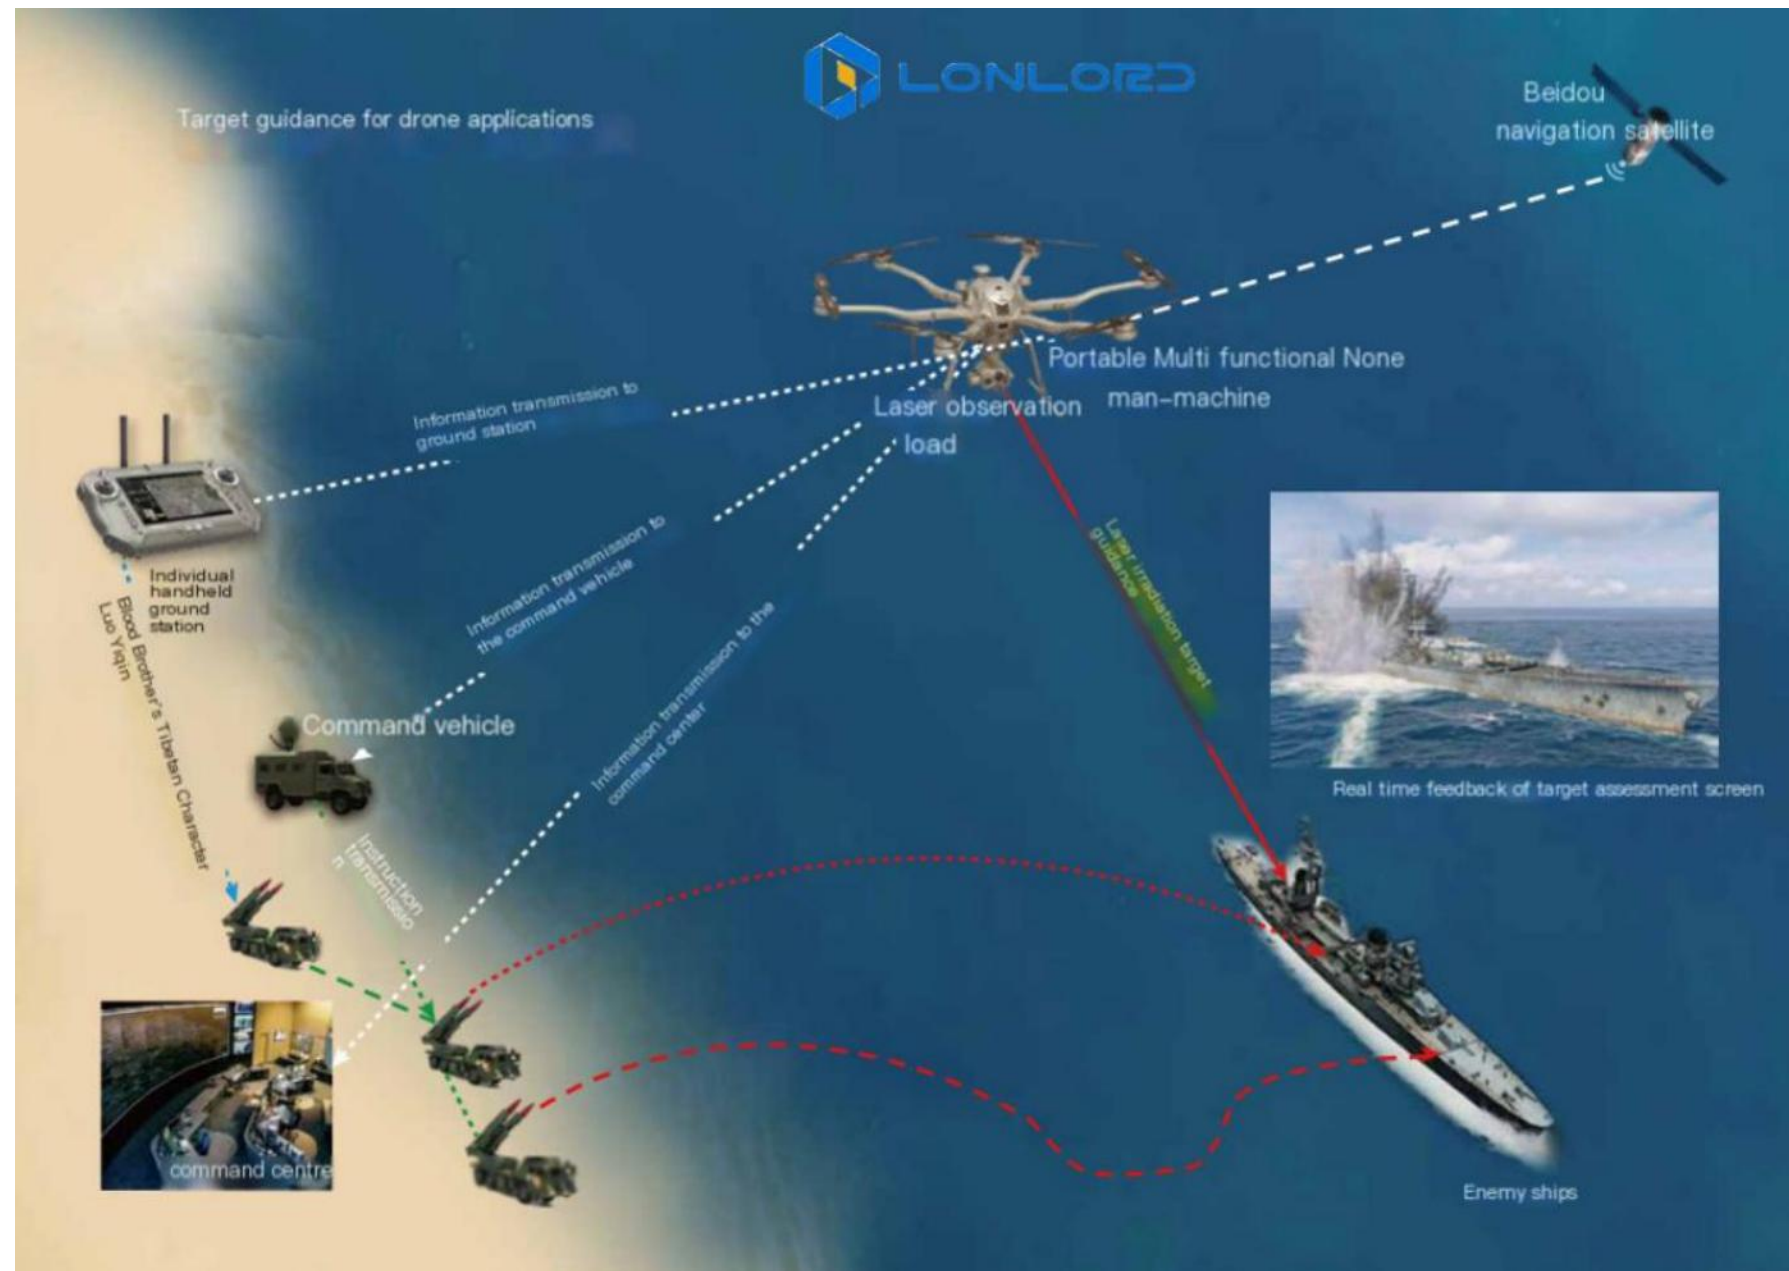

Obstacle
Avoidance

720° obstacle avoidance, perception range of 20-200 meters

Product introduction

The world's first 720° fully perceptive unmanned aerial vehicle. The flight power adopts a 12 rotor design, and the whole machine is connected by a quick detachable interface structure, which can simultaneously mount three types of load equipment, making it easy and flexible to use. The body adopts a plug-in wireless connection structure, which can carry visible light, infrared, night vision, laser ranging and other visual task payloads, obtain image information from a long distance and high definition, and has the ability to recognize, lock and track A. Supports mounting of Type 95 rifles, 50mm rockets, 60mm mortar shells, grenade launchers, and small visual guided missiles on hangers. The model supports single machine or cluster operation in various complex terrains.

High altitude tethered relay unmanned aerial vehicle

model: H16-V6-ST

Main Parameters Of Flight Platform

Body size	1530mmx1750mmx830mm
Aircraft wheelbase	1650mm
Empty weight	20kg
Tethered flight climb speed	≤ 3m/s
Tethered flight descent speed	≤ 2m/s
flight altitude	100m
maximum payload	20kg
Maximum takeoff weight	≤ 45kg
Flight altitude of 200m	
maximum payload	10kg
Maximum takeoff weight	≤ 40kg
flight altitude	300m
maximum payload	5kg
Maximum takeoff weight	≤ 35kg
Hover time	≤ 24h
Wind resistance capability	Level 7
Rainproof level	moderate rain
Sand and dust prevention	IP65
Operating temperature	-40 ℃~+65 ℃

Main Applications

Relay communication, fixed-point monitoring, mobile base station live broadcast, air ground integrated firepower network

Technical Features

Cooperate with a 300 meter mooring system to maintain a continuous empty space for no less than 12 hours

Integrated carbon fiber composite streamlined body

Modular and plug-in structure, easy to carry and transport, optional hanging of multiple task loads, excellent power redundancy, broken propeller protection function, dust-proof and sand proof design, can withstand moderate rain

Wind speed perception, capable of withstanding wind up to level 7

720° omnidirectional perceiving obstacle avoidance

Can be used independently or loaded with various types of armored vehicles on the ground for combined use

Ground Unit Parameters

Cable length: 350m Input current: 753 Max Output current: < 15A input voltage: AC220V ± 10% output voltage: adjustable 650V~1000V

Output power: ≥ 10KW

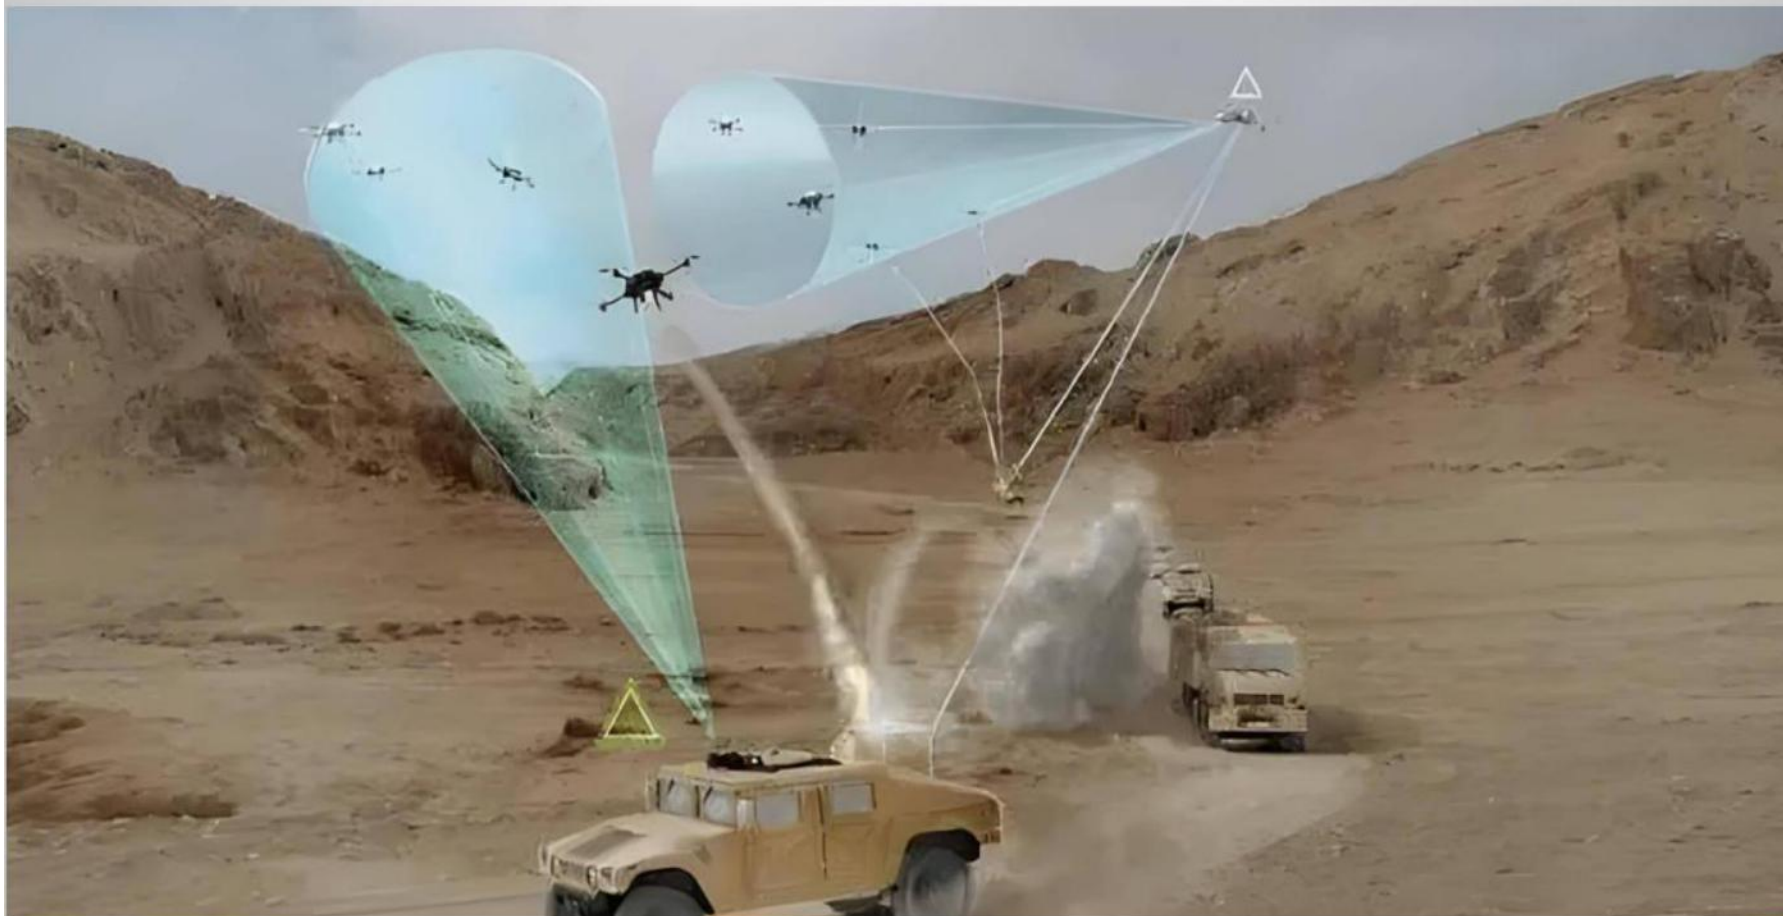

Fully automatic retractable cable

Key Product (Military UAV 7)

Transport UAV,
50 kg,
100 kg,
300 kg,
1 Ton,
3.5 Tons

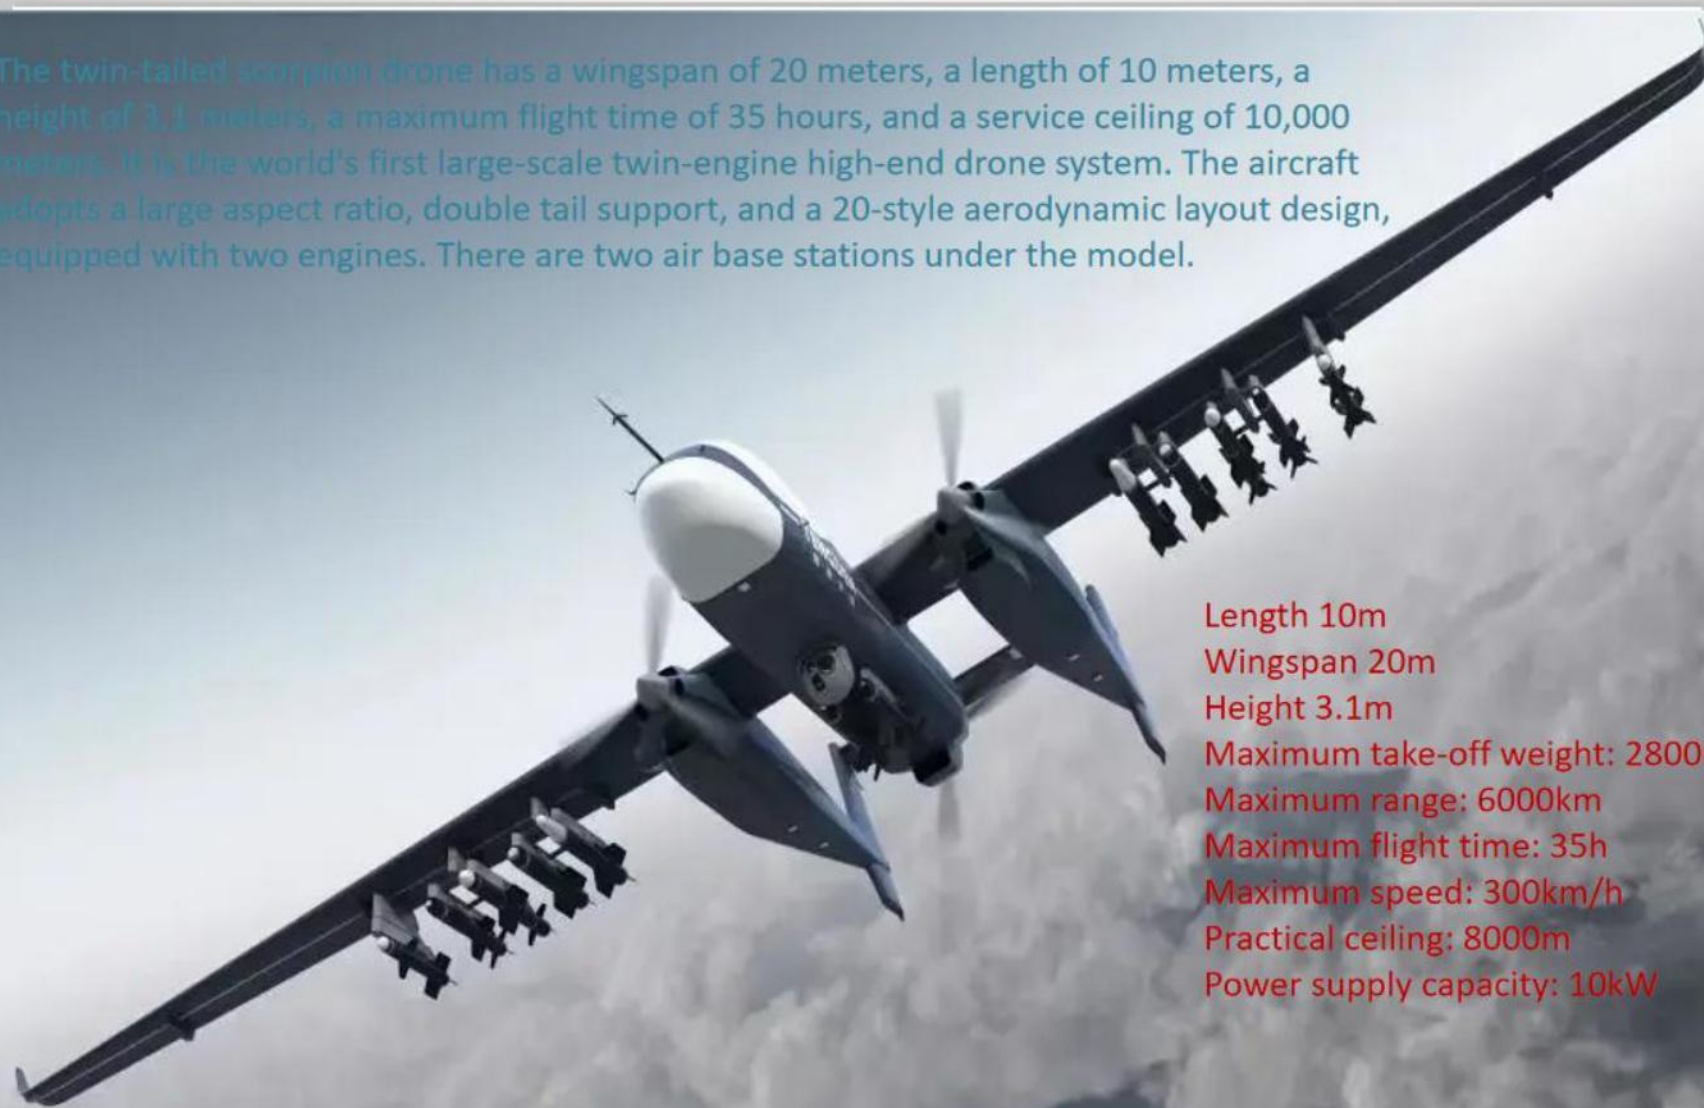

Key Product (Military UAV 9)

The twin-tailed scorpion drone has a wingspan of 20 meters, a length of 10 meters, a height of 3.1 meters, a maximum flight time of 35 hours, and a service ceiling of 10,000 meters. It is the world's first large-scale twin-engine high-end drone system. The aircraft adopts a large aspect ratio, double tail support, and a 20-style aerodynamic layout design, equipped with two engines. There are two air base stations under the model.

Length 10m
Wingspan 20m
Height 3.1m
Maximum take-off weight: 2800kg
Maximum range: 6000km
Maximum flight time: 35h
Maximum speed: 300km/h
Practical ceiling: 8000m
Power supply capacity: 10kW

Key Products (Robot 1)

LonLord Intelligent Robot

LonLord focus on Industrial Explosion proof Robot, unmanned aerial vehicle (UAV) ,Intelligent system integration services.

Key Products (Robot 2)

LonLord focus on Industrial Explosion proof Robot, unmanned aerial vehicle (UAV) ,Intelligent system integration services.

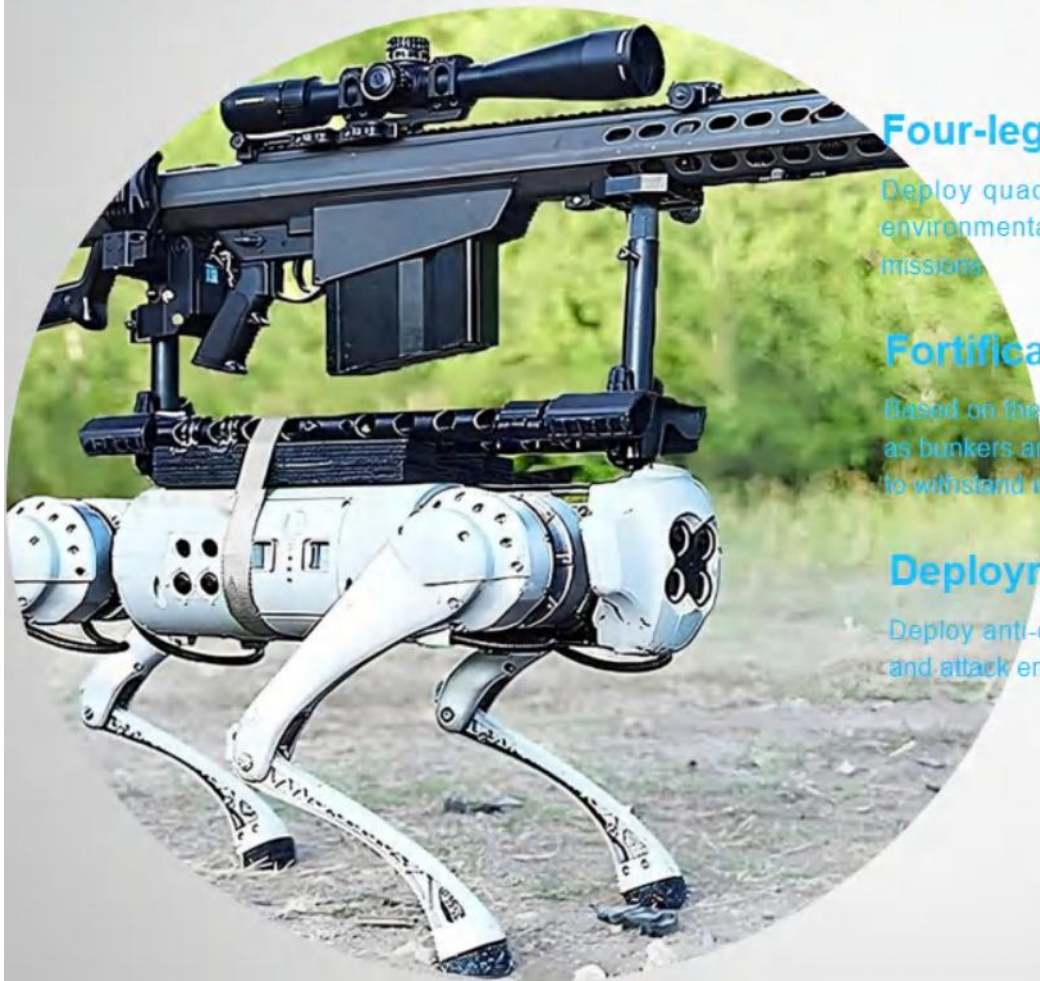

Key Products (Robot 3)

Ground defense position deployment planning

Four-legged robot patrol team formed

Deploy quadruped robots with autonomous navigation and environmental perception capabilities to perform ground patrol missions.

Fortification construction

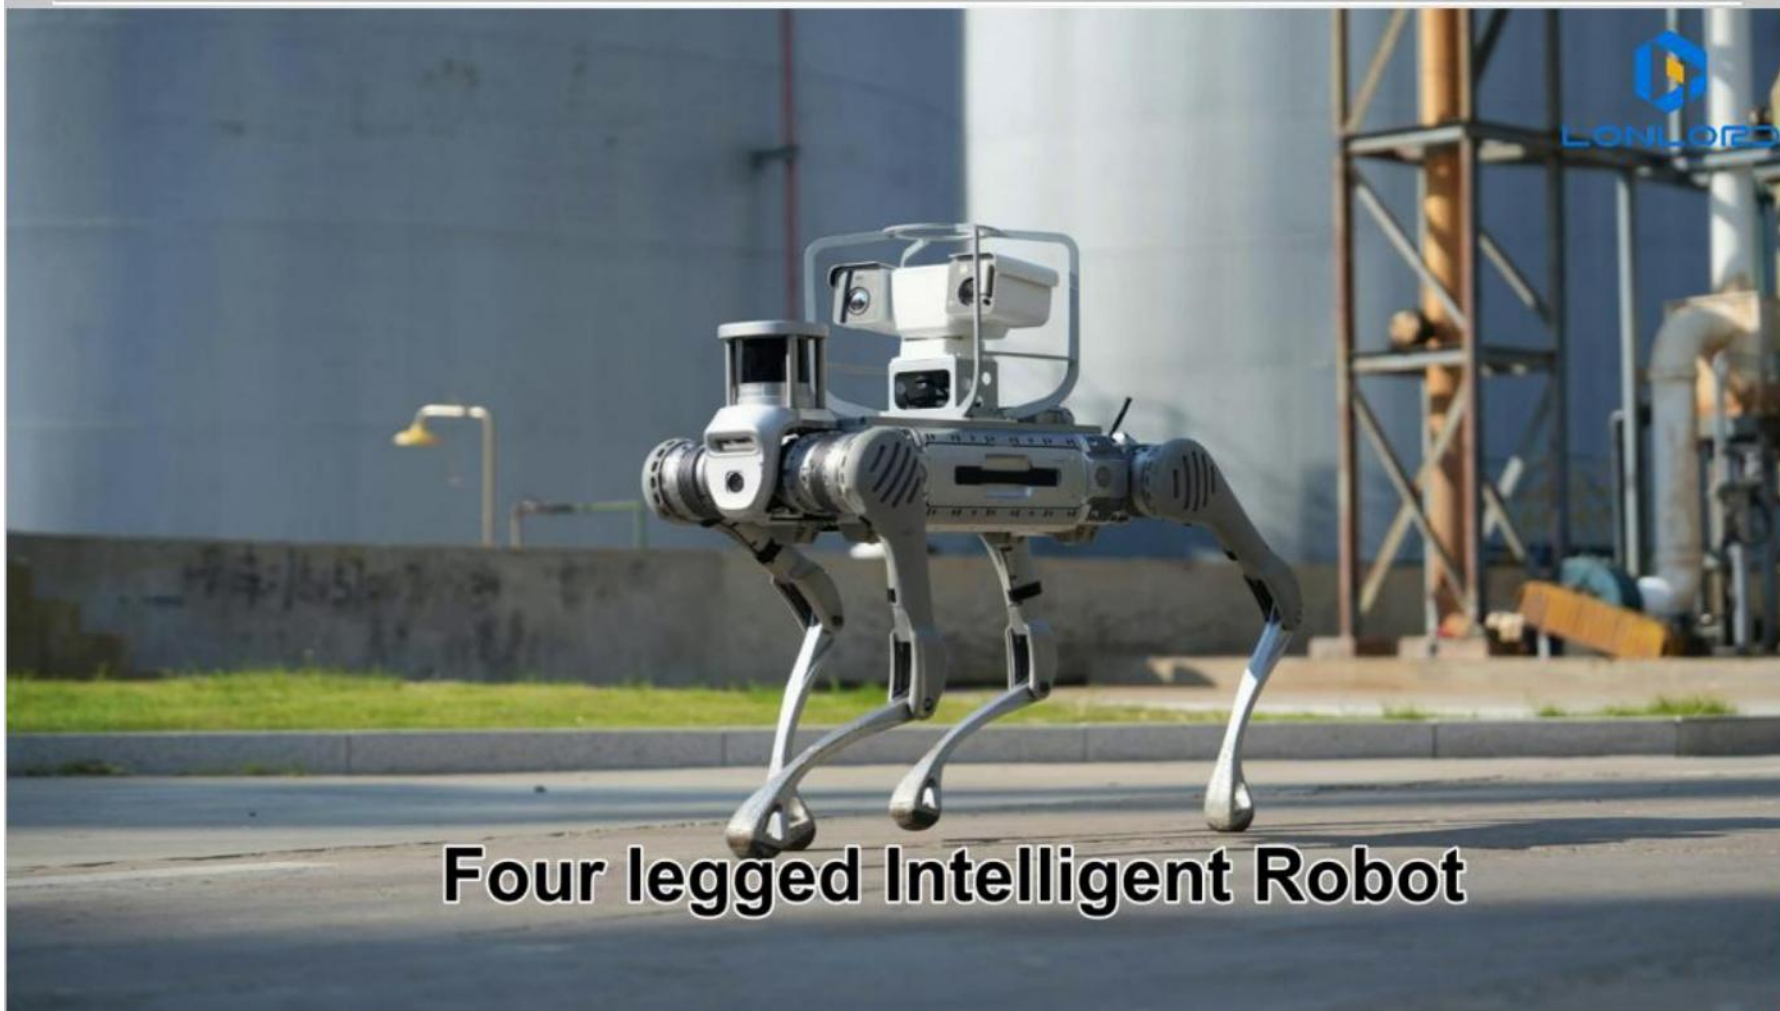

Based on the terrain and topography, defensive fortifications such as bunkers and trenches were built to improve the position's ability to withstand impact.

Deployment of anti-drone systems

Deploy anti-drone systems in key areas to detect, interfere with and attack enemy drones.

Key Product (Robot 4)

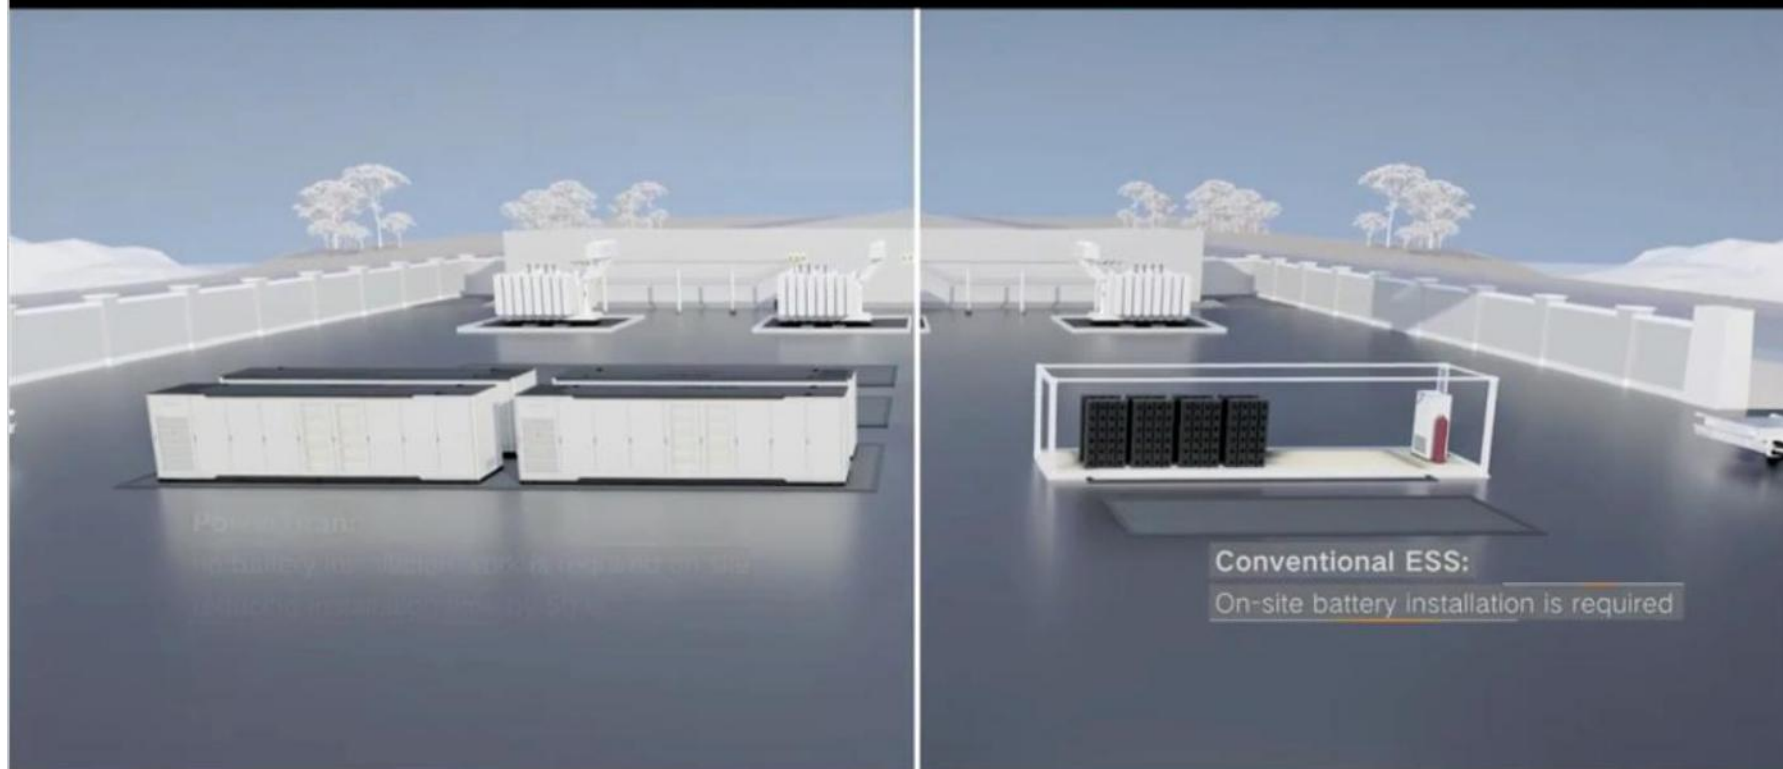

Four legged Intelligent Robot

LonLord focus on Industrial Explosion proof Robot, unmanned aerial vehicle (UAV) ,Intelligent system integration services.

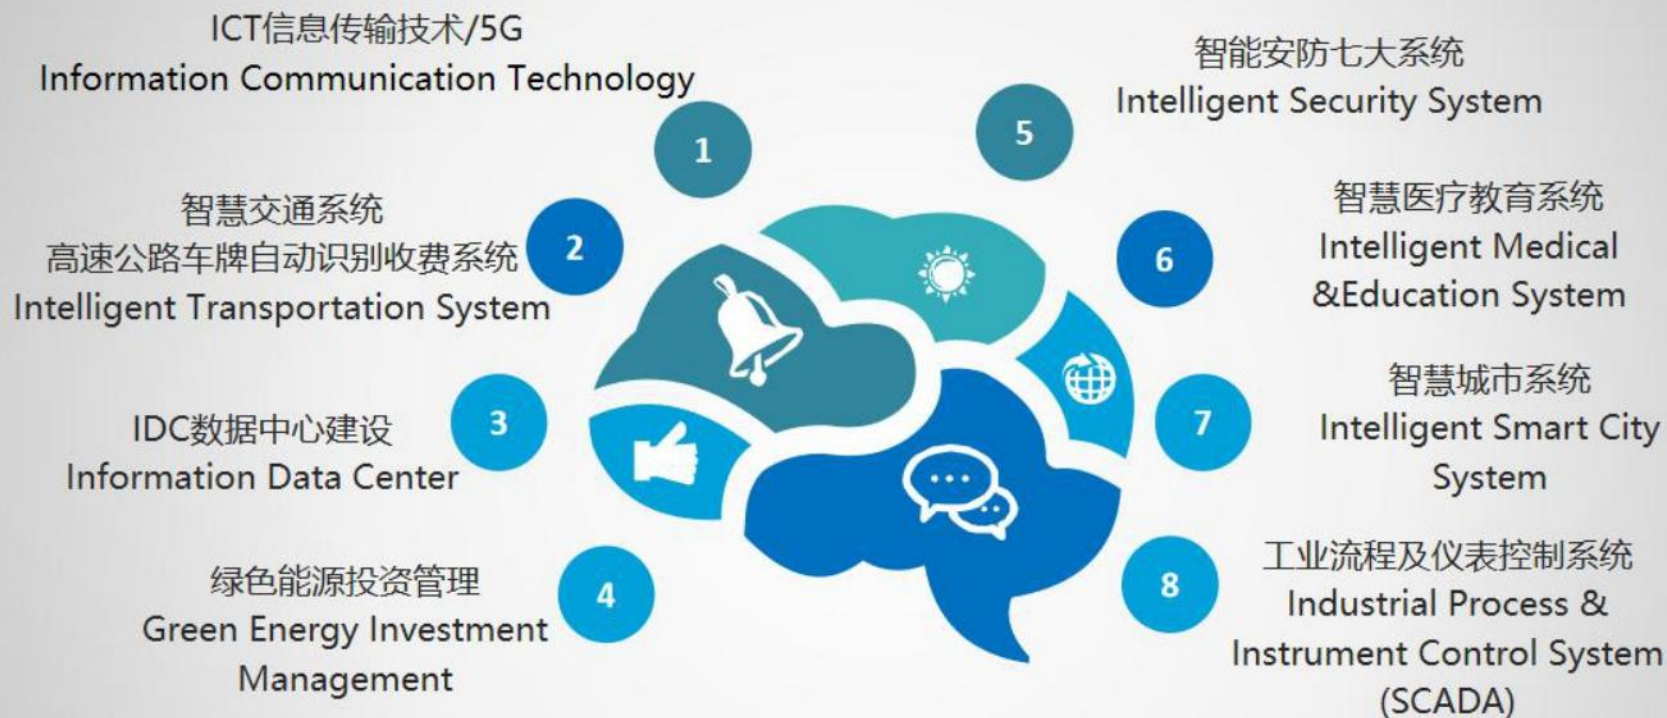

■ Key Product (Skid-type energy storage Station/Command Station/Monitoring Station)

LonLord focus on Industrial Explosion proof Robot, unmanned aerial vehicle (UAV) ,Intelligent system integration services.

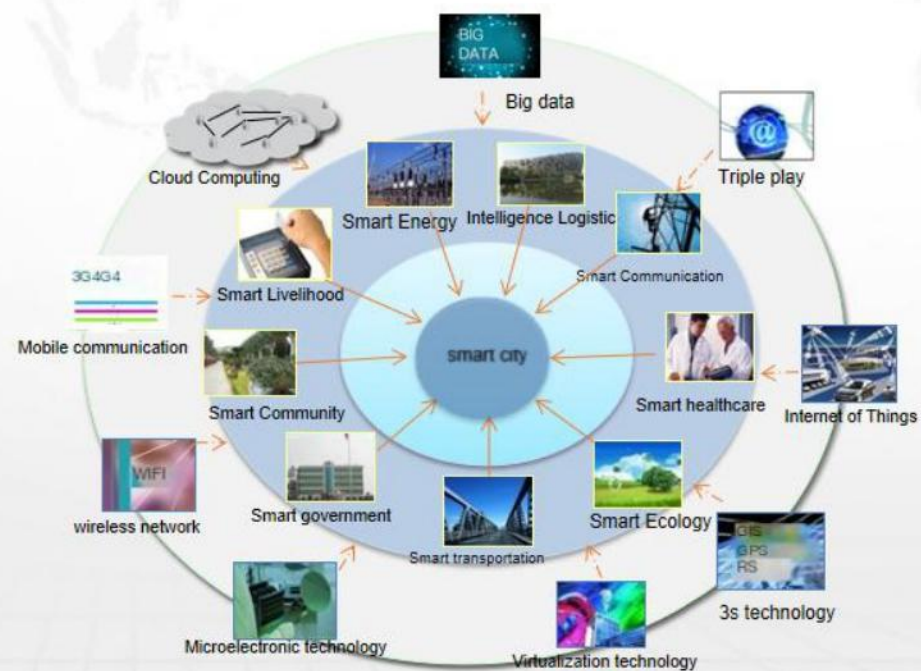

Key Technology - EPC Integration Services

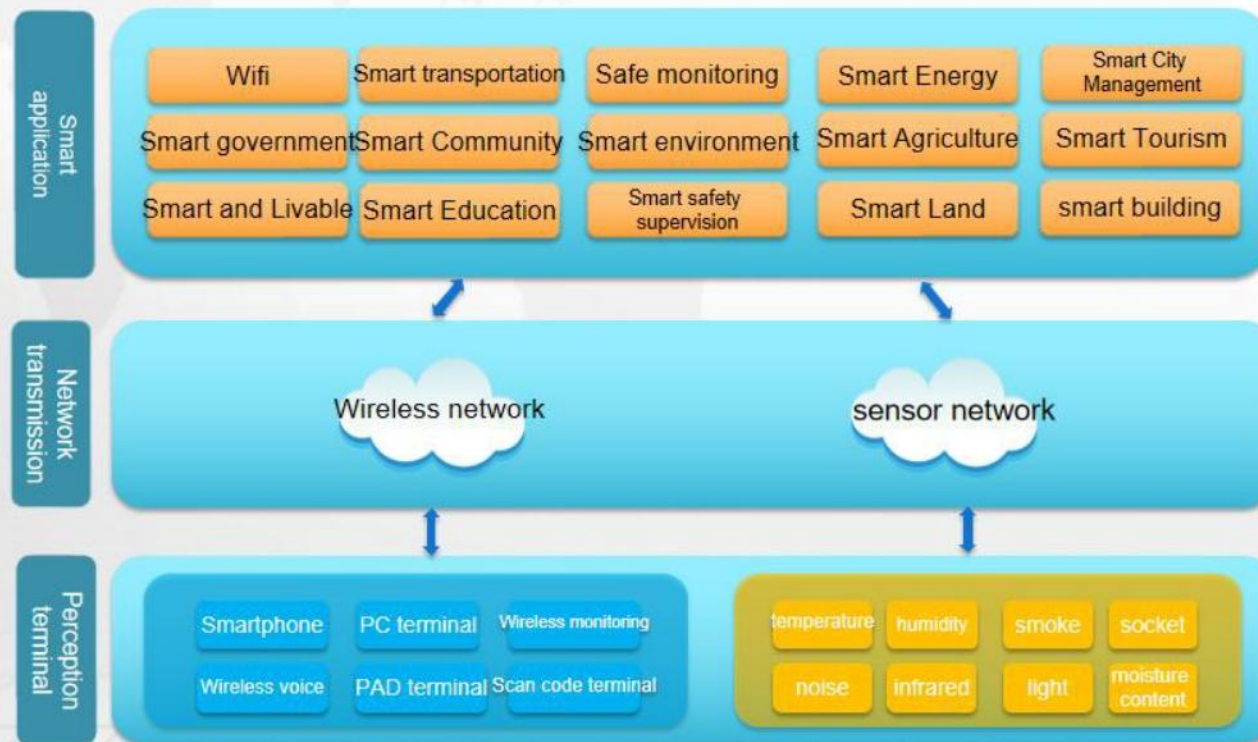

Smart City Application Technology

- Internet of Things
- Mobile internet
- Wireless network
- Big data
- Cloud computing technology
- Spatial Information Technology GIS
- 3D Virtual Reality Technology
